

Hi everyone,

As you may or may not be aware, the Bureau of Meteorology has put out a flood watch for the Richmond and Wilsons Rivers due to the expected amount of rainfall from today.

If this system does cause a large amount of rain, then the causeways on either side of our school have the potential of flooding over. In this instance our school may become non-operational.

We will be monitoring the system and causeways and will advise parents via phone or text regarding the operational status of the school.

### Next week

Any students not attending swimming will be expected to be at school as per a normal day. Students will be given work to do while others are at swimming.

We have started unit of work on Water Safety for all students, which has been put out by the School Sporting Unit.

A series of learning sequences with engaging animations has been created to support schools in delivering multiple water safety messages. These messages teach students how to behave in aquatic environments and be responsible in, on and around water.

The units of learning address five key water safety messages for each of the three stages. The five topics addressed throughout the units of learning, animations and teaching resources are:

1. How to stay safe in and around water
2. Personal safety
3. Aquatic settings
4. Personal survival
5. Rescue safely

Have a lovely week

Mrs Bath

### Coming Up

December 6 to 10

Swimming program

School Reports

Sent home on December 10

Last Day of school for students- 16 December
